Multi-Asset Strategies

Empowering Investors with Impactful Opportunities Since 1955

For 70 years, VanEck has sought to identify trends—economic, technological, political and social—that shape financial markets. We consider whether these create opportunities, perhaps even new asset classes, or present potential risks to existing portfolios.

Below are some of the critical milestones that shaped the firm's growth trajectory:

1955

Post WWII recovery creates opportunities with international companies in Europe and Asia

1968

In anticipation of inflation, concentrated investment in gold

1993

Prominence of China puts focus on rising influence of emerging markets

2006

Investor desire for liquidity, diversification, efficiency leads to ETF expansion

2012

Launch wide moat equity strategy focused on companies with sustainable competitive advantages

2017

Identify the disruptive potential of bitcoin and digital assets on financial services and beyond

At our core lies an emphasis on product development and offering solutions that meet the objectives of a wide-variety of investors. Our strategies are currently available across investment vehicles and, in many cases, we work directly with clients to tailor our solutions to meet their individual needs and requirements.
